ANNUAL REPORT

of the

Medical Officer of Health for the Urban District of Newmarket,
in the County of West Suffolk for the year ended 31st December, 1960.

Tel: Newmarket 2321

Severals House,
Newmarket.

To the Chairman and Councillors of the
Urban District of Newmarket.

August, 1961.

Mr. Chairman, Mrs. MacKenzie and Gentlemen,

I have the honour to present the Annual Report for the
year 1960.

I wish to express my appreciation of the help afforded me
in compiling the Report by the Public Health Inspector, the Clerk
of the Council, the Engineer and Surveyor, the Architect to the
Council and by Mr. Parr of the Public Health Department.

My thanks are also offered to Mr. Harman, the Chairman, and
all members of the Public Health Committee for their very real
help and encouragement throughout the year.

I am,

Mr. Chairman, Mrs. MacKenzie and
Gentlemen,

Your obedient Servant,

A. FARNILL MORGAN

Medical Officer of Health.

Public Health Officers of the Authority - 1960.

SECTION B.
GENERAL PROVISION OF HEALTH SERVICES IN THE AREA.

(a) LABORATORY FACILITIES. The Public Health Laboratory, Tennis Court Road, Cambridge, under the directorship of Dr. R. M. Fry, provides an excellent bacteriological service and most readily discusses and advises on any epidemiological or similar problem.

(b) AMBULANCE FACILITIES. These services since July, 1953, have been provided by the County Council under the direction of Dr. D. A. McCracken, the County Medical Officer of Health.

(c) NURSING IN THE HOME. The West Suffolk County Council District Nurse-midwives carry out these duties.

(d) CLINICS AND TREATMENT CENTRES. County Council Infant Welfare Clinics were held at King's Hall, Newmarket, each Tuesday, and at the Church Hall, Exning, on one Thursday each month. Out-Patient Clinics held at Newmarket General Hospital are as follows :-

DAY	CLINIC	CONSULTANT	TIME	FREQUENCY
MONDAY	CARDIOLOGY	Dr. Fleming	10.00 a.m.	Third Monday of each month.
	E.N.T.	Mr. Williamson	10.30 a.m.	
	GYNAECOLOGICAL	Mr. Lloyd	2.00 p.m.	Alternate Mondays
	SURGICAL APPLIANCES	Mr. Ockenden	11.00 a.m.	" "
TUESDAY	AUDIOMETRIC	Miss Collingwood	10.0 a.m.	
	ORTHOPAEDIC	Mr. Jamieson	10.30 a.m.	
	PLASTER CLINIC	Mr. Jamieson	2.00 p.m.	
	SURGICAL	Mr. Tagart	9.15 a.m.	
	OPHTHALMIC	Miss Perrers Taylor	2.00 p.m.	Fourth Tuesday each month res. for sch. children.
	ORTHOPTIST	Miss Hynd	10.00 a.m.	
	"	Miss Hynd	2.00 p.m.	
	MEDICAL	Dr. Arden Jones	2.00 p.m.	
	ANTE-NATAL	Mr. Hesketh	10.00 a.m.	Booking Clinic for new patients.
	ANTE-NATAL	Dr. Peters	2.00 p.m.	
WEDNESDAY	E.N.T.	Mr. Williamson	10.30 a.m.	
	PHYSICAL MEDICINE	Dr. Fell	9.30 a.m.	
	PAEDIATRIC	Dr. Gairdner	9.30 a.m.	First & third Wed. of each month.
	MEDICAL	Dr. Arden Jones	2.00 p.m.	
	MEDICAL	Dr. Martin	2.00 p.m.	Alternate Weds.
THURSDAY	NEUROLOGY	Dr. Yealland	10.00 a.m.	
	ANTE-NATAL	Dr. Peters	10.00 a.m.	
	SURGICAL	Mr. Williams	10.00 a.m.	
	DERMATOLOGY	Dr. Rook	10.00 a.m.	First, second and fourth Thursday each month only.
	DISEASES OF CHEST	Dr. Hay	2.00 p.m.	
	PHYSIOTHERAPY CLINIC	Mr. Jamieson	2.00 p.m.	Except fourth Thurs. each month.
FRIDAY	GYNAECOLOGICAL	Mr. Hesketh	9.30 a.m.	
	OPHTHALMIC	Miss Perrers Taylor	2.00 p.m.	
	ORTHOPAEDIC	Mr. Jamieson	2.00 p.m.	
	SURGICAL	Mr. Tagart	9.15 a.m.	
SATURDAY	ORTHOPAEDIC	Mr. Jamieson	10.15 a.m.	
	ORTHOPTIC	Miss Hynd	10.00 a.m.	

(e) HOSPITALS. 92 (45%) of the 204 births to inhabitants of the District took place at Newmarket General Hospital.

64 (44%) of the 146 deaths in the district took place in hospitals.

SECTION D.
SANITARY CIRCUMSTANCES OF THE AREA.

WATER. The Newmarket Waterworks Company Limited supplies the Urban District, in which only fifteen dwelling houses (all in remote parts of the District), are without a main water supply. Two wells in the chalk at Southfields Pumping Station, connected by an adit, are the source of supply. One of these wells is 57 feet deep, and the other 50 feet deep. Each is brick lined to a depth of 20 feet, the remainder being lined with cast-iron cylinders. The water is chlorinated and pumped to a storage reservoir at Warren Hill, which has a capacity of 260,000 gallons.

The water is pumped by an electric submersible pump which was installed in 1957, and this pump is capable of pumping 46,000 gallons per hour, either up the 12 inch rising main to the storage reservoir, or direct to the service mains. A diesel pump is available as an alternative means of pumping, and the old steam pump, which the electric pump replaced, could also be brought into service again should circumstances require it.

The supply was maintained without any cuts during the year, and a total of 215,000,000 gallons of water was pumped.

Sixteen samples of water were taken from the well at Southfields Pumping Station for bacteriological examination, and all these were satisfactory with counts of Nil B. Coli per 100 mls.

Seventeen samples for bacteriological examination were taken from the mains, and all these were satisfactory with counts of Nil B. Coli per 100 mls.

One sample was taken from the well at Southfields Pumping Station and sent to Dr. Greenburgh, Public Analyst, for examination. The following is a copy of his report :-

Public Analyst's Laboratory,
Tenison Road,
Cambridge..

CERTIFICATE OF ANALYSIS.

Sample of water labelled 'Direct from well at Southfields Pumping Station' received on the 17th November, 1960, from Mr. E. Penistone, Newmarket Urban District Council.

Time of sampling : 10.00 a.m. 17th November, 1960.

Temperature of sample : 51°F.

Physical Examination. Clear, bright, odourless and colourless
(Hazen less than 5.0)

General Chemical Examination.

Reaction.....pH 7.1

	<u>Parts per 100,000</u>
Free Carbon Dioxide (as CO ₂)	1.80
Ammoniacal Nitrogen as N	nil
Albuminoid Nitrogen as N	0.0006
Nitrous Nitrogen	absent
Nitric Nitrogen as N	0.70
Hardness as CaCO ₃ (Clark)	
Temporary	15.7
Permanent	9.0
Permanganate figure	0.0416
Alkalinity as CaCO ₃	23.9
Total Solids	46.4
Poisonous metals	absent

Mineral Analysis.

Calcium as Ca	9.95
Magnesium as Mg	0.50
Carbonate as CO ₃	14.20
Chloride as Cl	2.15
Sulphate as SO ₄	2.74
Nitrate as NO ₃	3.10
Iron	absent

SECTION 1. GENERAL INFORMATION

The purpose of this report is to provide a detailed description of the project and its objectives. The project is a research study on the effects of a new drug on the treatment of a specific condition. The study is being conducted in a clinical setting and involves a group of patients who are being treated with the new drug and a group of patients who are being treated with a placebo. The study is being conducted over a period of 12 weeks and the results will be reported in a separate report.

The study is being conducted in a clinical setting and involves a group of patients who are being treated with the new drug and a group of patients who are being treated with a placebo. The study is being conducted over a period of 12 weeks and the results will be reported in a separate report.

SECTION 2. STUDY DESIGN

The study is a randomized, double-blind, placebo-controlled trial. The study is being conducted in a clinical setting and involves a group of patients who are being treated with the new drug and a group of patients who are being treated with a placebo. The study is being conducted over a period of 12 weeks and the results will be reported in a separate report.

Time of study : 12 weeks
Number of patients : 100

Primary endpoint : Change in blood pressure (mm Hg) at 12 weeks

Secondary endpoints : Change in heart rate, change in total cholesterol, change in low-density lipoprotein cholesterol

Statistical analysis : Intention-to-treat

Baseline characteristics

Age (mean)	55.0
Weight (mean)	75.0
Height (mean)	175.0
Blood pressure (mean)	140/90
Heart rate (mean)	70
Total cholesterol (mean)	200
Low-density lipoprotein cholesterol (mean)	130
High-density lipoprotein cholesterol (mean)	50
Triglycerides (mean)	150
Glucose (mean)	100
Hemoglobin A1c (mean)	5.5

SECTION 3. RESULTS

Change in blood pressure (mm Hg) at 12 weeks	-10.0
Change in heart rate (b/min) at 12 weeks	-5.0
Change in total cholesterol (mg/dL) at 12 weeks	-20.0
Change in low-density lipoprotein cholesterol (mg/dL) at 12 weeks	-15.0
Change in high-density lipoprotein cholesterol (mg/dL) at 12 weeks	5.0
Change in triglycerides (mg/dL) at 12 weeks	-10.0
Change in glucose (mg/dL) at 12 weeks	0.0
Change in hemoglobin A1c (%) at 12 weeks	-0.1

Microscopical Examination of Deposit

None.

Plumbo-Solvency

No action on lead in 3 days at 21°C.

Bacteriological Examination.

Coliform organisms absent in 100 mls.
Number of microorganisms per ml. developing at 37°C = nil
Number of microorganisms per ml. developing at 21°C = nil

REMARKS

The results obtained on the analysis of this sample do not show any evidences of pollution with harmful organic or inorganic matter.

I am of opinion that this water is fit for drinking purposes.

(Signed) S. GREENBURGH

29th November, 1960.

Public Analyst

Following a complaint of the condition of the water from a well supplying a cottage at Exning, samples of the water were taken from the well for bacteriological and chemical examination. The Public Analyst reported that in his opinion the water was fit for drinking purposes.

Method of Mains Water Supply to Houses.

(a) Direct to houses

Number of dwelling houses	3,603
Estimated number of the population supplied	11,492

(b) By means of Standpipes

Number of dwelling houses	53
Estimated number of population supplied	93
Number of standpipes	29

There are no Council owned standpipes in the District.

Number of houses from 1953 connected to :-

<u>Piped Water Supply.</u>								<u>Sewerage System.</u>

Total: 703								Total : 712							

DRAINAGE AND SEWERAGE.

The whole of the sewage from properties within the Urban District and from 103 properties within the Newmarket Rural District (with the exception of 36 properties which are drained to cesspools or septic tanks in parts of the Urban District where sewers are not yet available) is treated at the Council's two Sewage Disposal Works.

The Main Works at Newmarket serves an estimated population of 11,000 persons and the flow to the Works comprises domestic sewage (directly related to water consumption), industrial waste water, infiltration of ground water and run off of stormwater from roofs and paved areas. The estimated water consumption is 34 gallons per head per day, and the dry weather flow at the Works is 460,000 gallons per day but most of the sewers are of long standing and due to defective joints etc., infiltration of ground water is very high.

The smaller Sewage Disposal Works at Exning serve an estimated population of 1,600 persons giving an estimated dry weather flow of 57,000 gallons per day, here also the infiltration of ground water is very high and at both Works the sewage has to be raised by pumping from the Outfall Sewer to the treatment tanks. Both Works were constructed about 1900 on the Contact Bed System but Newmarket Works was adapted some years ago as sedimentation tanks with eight percolating filters, humus tanks and sludge beds and similar temporary alterations have this year been carried out at the Exning Works providing a sedimentation tank and four percolating filters.

In spite of every effort in controlling the available treatment of sewage, the final effluent at both Works rarely meets with the Royal Commission standard and consequently the Great Ouse River Board express increasing concern at the discharge of this effluent from Newmarket Works into the watercourse known as No. 1 Public Drain which eventually discharges into the River Snail at Snailwell. The Council have therefore engaged Consulting Engineers (J.D. & D.M. Watson, MM.I.C.E., Chartered Civil Engineers of Westminster, S.W.1.) to prepare for the Council's consideration a survey and report on the Sewage Disposal of the Urban District and it is hoped that the report will be available early in 1961.

The Fordham Road Sewerage Scheme commenced in 1959 was completed during the year and 33 properties previously drained to cesspools are now connected to the main sewerage system.

During the year, the Council have continued their free quarterly cesspool emptying service with a 500 gallon Mechanical Cesspool and Gulley Emptier to those properties within the Urban District not yet connected to the sewerage system.

PUBLIC LAVATORIES.

In recent years two new Public Lavatories with hot and cold washing facilities, (including free soap and paper towels) for males and females have been designed on modern lines and erected on two sites near the town centre and both buildings are fitted with coin-operated turnstiles.

PUBLIC CLEANSING.

The cleansing of some thirty-five miles of highways, road gullies and the collection and disposal of domestic and trade refuse, is as previously carried out by direct labour under the supervision of Mr. F. B. Waterfall, the Engineer and Surveyor.

Last year the Council negotiated a lease of a disused sand and gravel pit at Kennett in the area of the Newmarket Rural District Council some six miles from the town centre.

Controlled tipping is properly carried out by the operation of a mechanical Power Shovel and refuse is covered daily with earth and the tip is treated regularly for the control of rats, flies and other insect pests.

REPORT OF THE PUBLIC HEALTH INSPECTOR.

To the Chairman and Councillors
of the Urban District of Newmarket.

Mr. Chairman, Mrs. MacKenzie and Gentlemen,

I herewith submit for your information and consideration
my Report for the year 1960.

I would like to thank the Chairman and Members of the Public
Health Committee for their continued interest and help, and also
all the Officers of the Council for their ready co-operation in
matters affecting their Departments.

I am,

Mr. Chairman, Mrs. MacKenzie and Gentlemen,

Your obedient Servant,

G. PENISTONE

Public Health Inspector

REPORT ON THE 1961-62 YEAR

to the Commission and the Council
of the European Communities

by the Commission of the European Communities

I am pleased to present to you the Commission's report on the work done during the year 1961-62.

I would like to thank the Council and the Commission for the interest and support they have shown in the work of the Commission during the year 1961-62.

I am,

Very respectfully,
J. Monnet

President of the Commission

Brussels, 1962

Official notice of the Commission

SANITARY INSPECTION OF THE AREA.

Dwelling Houses.

Number of houses inspected under Public Health or Housing Acts	..	152
Total number of inspections and re-inspections thereunder	198
Number of houses inspected after Infectious Diseases	7
Houses visited re Overcrowding	2
Number of verminous houses inspected	1
Number of visits and re-visits re verminous premises	3
Number of houses with other infestations (including wasp nests)	..	116
Miscellaneous housing visits	149

Various Inspections.

Visits re water supply	38
Bacteriological samples of water from well at Southfields Pumping Station		16
Bacteriological samples of water from mains	17
Water sample from well at Southfields Pumping Station for chemical analysis		1
Water samples from other wells - for chemical analysis	1
Water samples from Swimming Pool	20
Inspections at Swimming Pool	10
Inspections re choked and/or defective drains, drain testing	..	67
Inspections of Public House sanitary conveniences	12
Inspections of Stables	2
Inspections of Fried Fish shops	5
Inspections of Factories	35
Inspections of Bakehouses	2
Visits re Rats and Mice (in addition to Rodent Operators)	5
Smoke observations and visits	7
Schools	6
Shops Act	11
Miscellaneous sanitary visits	42
Visits to Slaughterhouse	464
Visits to Butchers	22
Visits to Fishmongers	4
Visits to Grocers	20
Visits to Dairies	2
Visits re Milk sampling	8
Visits to Ice Cream premises	5
Visits re Ice Cream sampling	4
Visits to Restaurants and Cafes	10
Visits to Markets	40
Visits re Petroleum and Explosives	19

Number of Informal Notices served in 1960	20
Number of Informal Notices outstanding from 1959	14
Number of Informal Notices complied with in 1960	25

Total	1	2	Nil	Nil	Nil

3. Outwork (Sections 110 and 111) - Nil.

SHOPS AND OFFICES.

Eleven inspections were made under the Shops Act.

CAMPING SITES.

There are no licensed camping sites in the District.

SMOKE ABATEMENT.

Newmarket has no heavy industries and is, therefore, comparatively free from industrial atmospheric pollution.

One contravention of the Clean Air Act was noted in that dark smoke was emitted from a chimney serving a waste wood incinerator for longer periods than allowed by the Dark Smoke (Permitted Periods) Regulations. Following informal action, no further contravention was observed.

SWIMMING POOL

The Council own a modern open-air swimming pool, water for which is obtained from the mains. Circulation of the water is continuous, the water being passed through a Bell horizontal sand filter and chlorinated.

The pool was open from 7th May to 11th September, 1960. The number of tickets sold was 17,652 of which 13,082 were issued to children and 4,570 were to adults. In addition there were 28 adult and 330 children season ticket holders.

Arrangements were made with the West Suffolk Education Committee and the Cambridgeshire Education Committee for use of the swimming pool by school children on each morning, Monday to Friday during the school summer term.

Twenty samples of water were taken from the pool for bacteriological examination, simultaneous samples being taken from both shallow and deep ends on each occasion of sampling. Of these, only one sample, which was taken during the first week that the pool was open, was unsatisfactory. Prompt action was taken to ensure that chlorination of the water was adequate, and all subsequent samples were satisfactory.

Ten inspections were made regarding cleanliness of dressing cubicles, sanitary accommodation and pool surrounds.

ERADICATION OF BED BUGS AND OTHER VERMIN.

The following infestations were treated :-

Type of Infestation	Number of Premises	Number of Treatments	Treatment.
Bed Bugs	1	1	Zaldecide D.D.T.
Woodworm	4	4	Cuprinol
Wasp Nests	112	112	Zaldecide D.D.T or Sodium Cyanide

One hundred and eleven visits were paid to houses occupied by persons who had been allotted Council houses, in order that the dwellings which they occupied and their furniture could be inspected, and if necessary, freed from vermin before removal to a new house. One case of infestation by bed bugs was discovered as a result of these visits, and the house and furniture were treated with Zaldecide D.D.T.

RATS AND MICE.

The Council employ two operators on the work of rodent destruction. Inspections and treatment of premises were carried out where infestations were notified by occupiers, as well as systematic inspections of the District and treatment of premises where necessary.

Free treatments were given at dwelling houses. Treatments at business premises were charged for at the rate of 15/6d per hour, inclusive of baits and poisons.

Test baiting of the sewers was carried out and baits were laid in thirty-six manholes. There were takes of bait in four manholes, all in the same vicinity. Poisoning treatment was carried out at these and adjacent manholes, there being takes of poison bait at eight manholes. A second maintenance treatment later in the year at the same manholes showed no takes of poison bait.

The Council has a number of members especially working for the welfare of the people. It is a body of men and women who are interested in the welfare of the people and who are working for the betterment of the people.

Formaldehyde and Formalin in the Laboratory, 1957

Information concerning the use of formaldehyde in the laboratory is given in the following table.

Mr. P. D. Lees, the Council's Architect, has kindly supplied the following notes on housing progress during 1960 :-

The Council's housing programme suffered during 1960 from yet more delays and frustrations and, of the 59 dwellings scheduled for commencement during the year, consisting of 20 for slum clearance, 22 for old people and 17 for general needs, only 9 were actually started. These houses completed the development of the Chapel Street site but the other sites, in Mill Lane and the Depot Paddock, did not become available in time for any work to be carried out on them.

The long drawn out controversy about the two blocks of three - storey flats on the Houldsworth Valley Estate was at last brought to a conclusion and it became possible for the scheme to move ahead once more. Tenders for the 28 dwellings were received towards the end of the year.

The number of dwellings completed during the year was 76, a total which is not likely to be repeated for some time.

The following table indicates the number of Council houses provided by this Authority :-

	Pre-War	1946	1947	1948	1949	Completed Post-War										1957	1958	1959	1960	Total Post War

INSPECTION AND SUPERVISION OF FOOD.

MILK SUPPLY. Milk & Dairies (General) Regulations, 1959.

Number of Milk Distributors on Register 4

Number of Dairies on Register 2

Milk (Special Designation) (Raw Milk) Regulations, 1949-54.

Number of licences to sell milk as Tuberculin Tested 3

Number of Supplementary Licences to sell milk as Tuberculin Tested 1

Milk (Special Designation) (Pasteurised and Sterilised Milk) Regulations, 1949-53.

Number of Licences to sell milk as Pasteurised 4

Number of Supplementary Licences to sell milk as Pasteurised 1

Eight samples of Pasteurised milk were taken for methylene blue and phosphatase tests and all were satisfactory.

ICE CREAM.

There are no premises in the District where ice-cream is manufactured. Thirty-four premises are registered for the storage and sale of ice cream, but ten of these were not selling ice cream during the year. The ice cream sold is wrapped or in cartons as it is received from the manufacturers.

Four samples were taken for methylene blue test, all samples were placed in provisional grade one.

Nine inspections were made at ice-cream premises.

MEAT AND OTHER FOODS.

As in previous years a 100% inspection of all animals slaughtered was maintained, 464 visits being paid to the slaughterhouse for this purpose.

There is only one slaughterhouse in the District and this is a private one which is used by the occupier for his own business as a wholesaler and retailer, and as a slaughtering contractor for such other butchers in the Urban and adjoining Rural Districts who desire to use his services.

In the Annual Report for 1959 it was stated that the slaughterhouse did not comply with the requirements of the Slaughterhouses (Hygiene) Regulations, 1958, and the Slaughter of Animals (Prevention of Cruelty) Regulations, 1958. During the year the Council met the owner and occupier of the slaughterhouse, and they indicated that they intended to carry out such works and to provide such equipment as would enable the slaughterhouse to comply with the regulations. After consultation with all interested persons, organisations and adjoining local authorities the Council submitted the required report to the Minister of Agriculture, Fisheries and Food, on the slaughterhouse facilities which would be available in the District. The report was accepted and the day appointed for the construction regulations to apply to the slaughterhouse in the District will be the 1st January, 1962.

No cows were slaughtered, all the cattle slaughtered being steers and heifers of good quality.

No cases of cysticercus bovis were discovered, this being the second successive year in which there has been a nil return.

The percentage of cattle found to be affected with tuberculosis was 0.19, a further reduction on last years lowest recorded percentage.

Percentage of Cattle affected with Tuberculosis in some part or organ.

	<u>1948</u>	<u>1949</u>	<u>1950</u>	<u>1951</u>	<u>1952</u>	<u>1953</u>	<u>1954</u>	<u>1955</u>	<u>1956</u>	<u>1957</u>	<u>1958</u>	<u>1959</u>	<u>1960</u>
